

WinNetStar Release Notes

August 29, 2012

RELEASE NOTES

Added Check Date to the Payroll stub.

Corrected some inconsistencies with Payroll Direct Deposit ACH files.

Corrected an issue with Core pricing when the price level is changed on a POS document.

Added a prompt to update all locations pricing when manually changing a price on an Item Master.

Fixed the display issue on the dollar amount not showing in new Payments and Pay Bills.

Fixed an issue where the user could change the Transfer To location after parts were already on the gird.

Added a function on all POS documents to "Recalculate Prices" on items. This will check for the most current pricing on a part and update the part as needed. Additionally, it will also check the Promotional Pricing setup to change pricing as needed.
