# WinNetStar Release Notes

---

May 18, 2011

Source	Release Notes
Colpron	Corrected an issue with amount allocation on an IR/Bill when a customer back order was not found on a PO.
B&G Equipment	Added Line type and NEW/USED from WG master to the Sales Tax Detail Report.
Lilley	Fixed an issue with incorrect accounting for core returns and ran a data base program to fix any incorrect entries caused by the error.
Internal	The quantity column is no longer editable on a Core Return. Please use Apply Core Credits to return cores.
Lilley	Fixed an issue with Fleet Charge transactions where Labor items with fractions in hours were causing the totals to be different from the original invoices.
Internal	Added labor line items to the Customer Line Item Detail Report. Additionally, a Date Filter based off of Document Date or Closed Date has been added to this report.
Lilley	Added an option in Customer Statements to print copies of Invoices or signed copies if using a signature capture device. <b>Please see attached documentation.</b>
Internal	Expanded the dollar value field in inventory adjustment document to allow dollar adjustments up to \$9,999,999.99
