Changing CSPS Password
Instructions for changing CSPS Password

Software Development

RIMSS Business Systems Technology

You are required by CSPS to change the CSPS password every 60 days. This is the password that is used to upload orders and Show CSPS Info from the Inventory Master List. This same rule also applied to the previously used CCN software.

With the changes to CSPS it is now easier to change passwords since you no longer have to change the password on the Dealer Portal, then change in WinNetStar. Using the instructions on the following pages will allow you to change the CSPS password in WinNetStar. This process will also reset the password on the CSPS Dealer Portal.
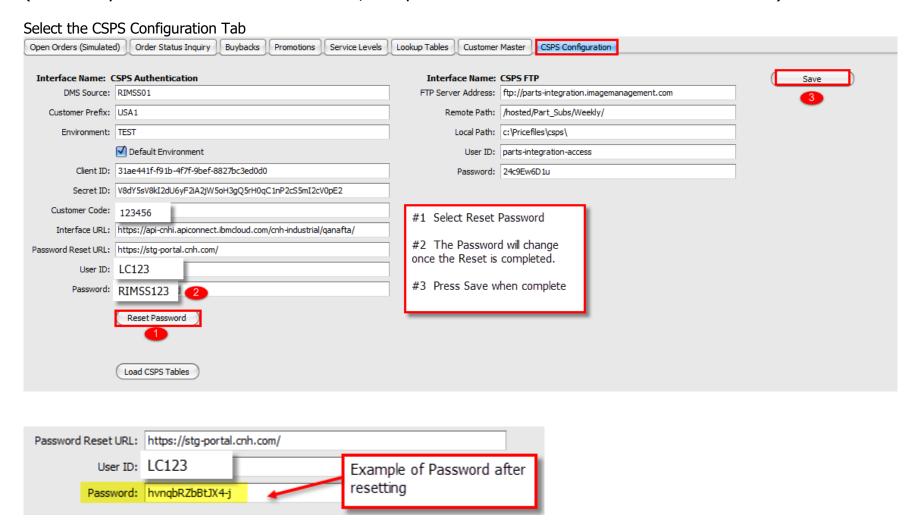

If you receive the following message, this message indicates your CSPS password must be changed. See instructions on next page.
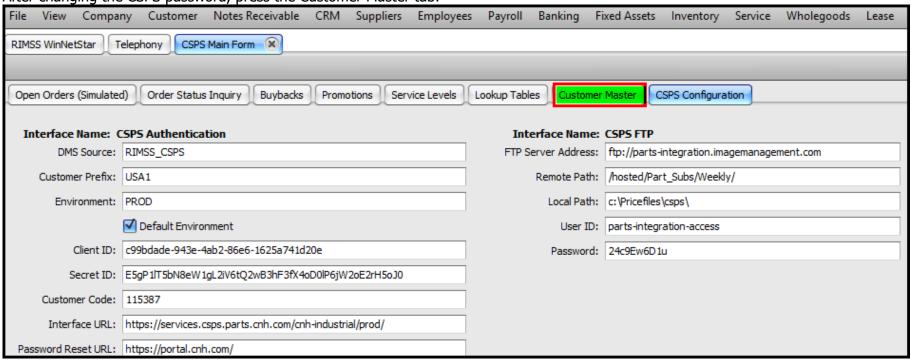

Navigate to the following:

Inventory → Utilities → CNH → CSPS

(Note – if you are a multi-location dealer, this process will need to be done in each location)

Select the CSPS Configuration Tab

| Open Orders (Simulated) | Order Status Inquiry | Buybacks | Promotions | Service Levels | Lookup Tables | Customer Master | CSPS Configuration |
